

JOINT STRATEGIC NEEDS ASSESSMENT (JSNA) POPULATION STATISTICS 2016

HILLINGDON
LONDON

August 2016
BUSINESS PERFORMANCE TEAM

Population estimates

Population estimates are the starting point to inform decisions regarding the provision of services such as education, housing, transport and health.

Any overarching appraisal of need and subsequent commissioning of services will consider the change in the size of the population living locally.

The most widely used population projections are sourced from National Statistics and are known as sub-national population projections (SNPP). These projections are available by single year of age, by sex for Local Authorities from mid-2014 to mid-2039.

Table 1

Hillingdon population	Year	Population estimate
National Statistics, Census-based sub-national population projections (SNPP)	2016	304,000
Greater London Authority (GLA) 2015 round shlaa-based capped household projections	2016	299,000
Hillingdon Clinical Commissioning Group (CCG) GP registered population	2016 (July)	303,000
National Statistics, 2015 mid-year estimate	2015	298,000
National Statistics, total Electors	2015 (December)	196,000
Greater London Authority, total daytime population (including tourists)	2014	357,000

Population statistics

The population pyramid below (Figure 1) shows the age and sex distribution of the 2016 population estimate for Hillingdon based on the 2014 SNPP population estimates for 2016.

The lines around the outside of the pyramid show the distribution for Hillingdon, London and England.

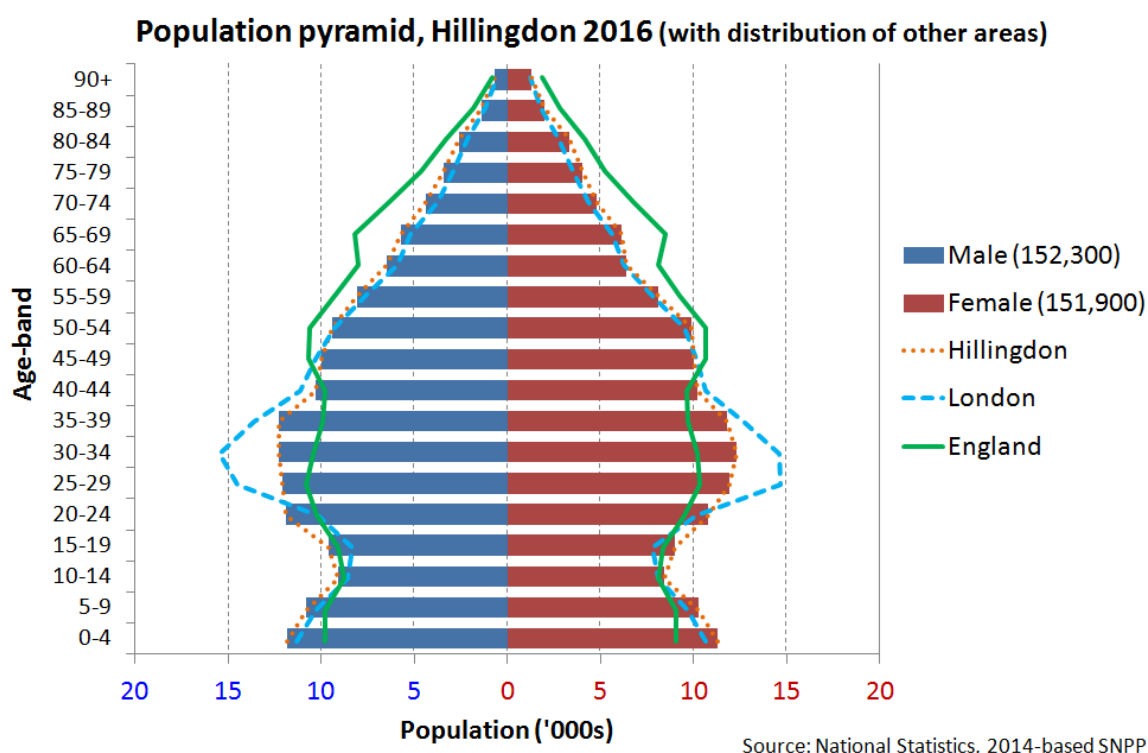

Figure 1

The proportion of the population aged 0-9 and 15-44 is greater in Hillingdon than in England and the proportion of the population aged 45+ is lower in Hillingdon than in England.

We can also see that the proportion of the population aged 15-24 is greater in Hillingdon than in London. Also note that the proportion of the population aged 25-44 is lower in Hillingdon than in London. The proportion of males and females aged 45+ in Hillingdon is similar to the proportion in London.

The proportion of older people (age 65+ years) in Hillingdon is slightly higher than London, but lower than England. 38,900 people are aged 65 years or more.

Population statistics

Table 2 shows the 2016 sub-national population projections that have been calculated from the 2014 mid-year estimate. Table 3 shows the 2015 mid-year estimate (the most recent mid-year estimate as of June 2016).

Table 2

Age	2016 projection	%
0-4	23,070	7.6%
5-9	21,060	6.9%
10-14	17,480	5.7%
15-19	18,610	6.1%
20-24	22,630	7.4%
25-29	23,990	7.9%

Sub-borough level estimates

The population figures from the 2011 Census are available at Ward and other sub-borough geographical unit areas (including Middle super output areas, MSOAs; Lower super output areas, LSOAs; Output areas, OAs). However, the latest ward population figures are the GLA 2015 Round Demographic Projections, 2016.

2015 population estimate

National Statistics have just released the 2014 mid-year estimate (MYE) for the population of Local Authorities, regions and countries of the United Kingdom.

The population pyramid below (Figure 2) shows the age and sex distribution of the 2014 MYE for Hillingdon. The lines around the outside of the pyramid show the distribution for Hillingdon, London and England.

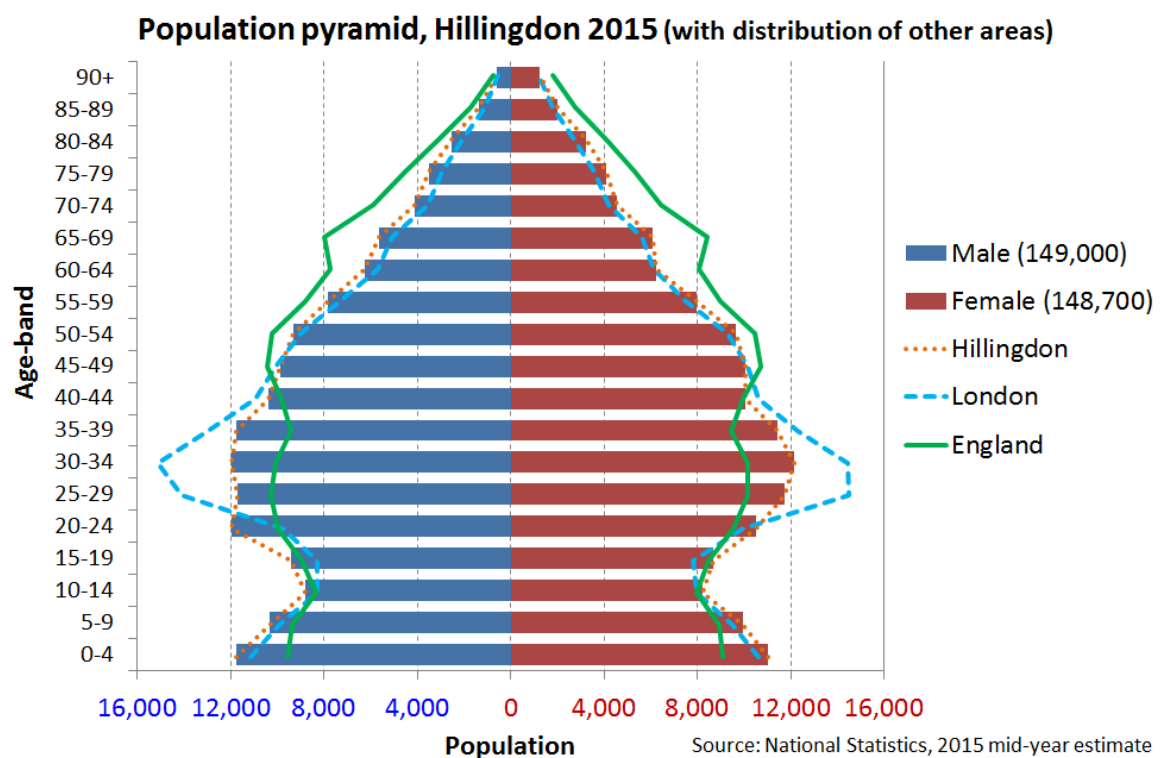

Figure 2

The distribution of the population in Hillingdon shows a higher proportion of 0-39 year olds and a lower proportion of 45+ year olds than England.

The 2015 MYEs (rounded to the nearest 10) for quinary age-bands for Hillingdon are shown in Table 5.

Table 5

Quinary age-band	Male	Female	Persons
0-4	11,740	11,000	22,740
5-9	10,350	9,970	20,320
10-14	8,780	8,210	16,980
15-19	9,400	8,680	18,080
20-24	11,950	10,500	22,450
25-29	11,700	11,720	23,420
30-34	11,970	12,130	24,090
35-39	11,770	11,430	23,200
40-44	10,370	10,050	20,420
45-49	9,880	10,050	19,940
50-54	9,300	9,640	18,940
55-59	7,830	7,940	15,770
60-64	6,240	6,220	12,460
65-69	5,660	6,080	11,730
70-74	4,100	4,570	8,670
75-79	3,500	4,090	7,580
80-84	2,510	3,210	5,720
85-89	1,380	1,990	3,360
90+	600	1,260	1,860
All ages	149,010	148,720	297,740

Figure 3 shows the population increase in Hillingdon and some select neighbouring boroughs. Compared with Brent, Ealing, Harrow and Hounslow, the population in Hillingdon has increased the most each year since 2012. The population in Hillingdon is estimated to have increased by 17,000 (rounded to the nearest 100) persons between 2012 and 2015. Figure 4 shows how the population has increased in select neighbouring boroughs compared with London region and England. The population in Hillingdon is 5.7% more in 2015 than 2012; the corresponding figures for London and England are 4.4% and 2.4% respectively.
